What is this product?

Type

This is an open-ended UCITS fund established as an Irish Collective Asset-Management Vehicle (ICAV).

Objectives

Investment objective The investment objective of the Fund is to achieve a positive absolute return over a medium to long term period.

Investment policies The Fund may invest up to 100% of its Net Asset Value ("NAV") directly/indirectly in equities, fixed income (of governments and high grade corporates of various types and maturities), currencies and interest rates and may reduce its allocation for any given asset class or classes to 0% of the NAV where doing so would offer the potential for growth and return for the Fund in light of the economic and market conditions. In order to gain exposure to these asset classes, the Fund will also invest in underlying funds, convertible bonds and financial derivative instruments (financial instruments whose value is derived from the value of other assets) ("FDI") listed or traded on a recognised market or traded over-the-counter funds. A convertible bond is a type of bond that can be converted into a specified number of shares of a company or cash of equal value.

The Fund may invest up to 30% of its NAV in below investment grade fixed income, fixed income related securities and convertible bonds. A rating agency gives an investment grade rating when it believes that there is a relatively low risk that the issuer of a bond will be unable to make payments.

The Fund may invest up to 100% of its net assets in underlying funds namely Undertakings for Collective Investments in Transferable Securities ("UCITS") and acceptable Alternative Investment Funds ("AIFs") in accordance with the Central Bank's requirements, including open-ended exchange traded funds and investment trusts which are regulated and domiciled globally. The Fund may not invest more than 20% of its NAV in any one underlying fund and that investment in acceptable AIFs may not, in aggregate, exceed 30% of the NAV of the Fund.

The Fund may invest up to 80% of its NAV in emerging markets.

The Fund may also invest in FDIs to help try to achieve the Fund's objectives and to reduce risk or cost for the Fund.

For more information about the investment policies and strategies please refer to the sections entitled "Investment Policies" and "Investment Strategies" in the supplement for the Fund.

Benchmark The Fund is actively managed without reference to any benchmark meaning that the Investment Manager has full discretion

over the composition of the Fund's portfolio, subject to the stated investment objectives and policies. It exercises a flexible global strategy in the selection of investments, not limited by geographical location, investment style or asset class.

Redemption and Dealing You can buy and sell your shares in the Fund before 12pm (Irish time) on each day of every week providing it is a business day (when the retail banks in Dublin are open).

Distribution Policy It is not the intention to distribute dividends to Shareholders for this Class.

Launch date The Fund was launched on 29/06/2017. The share class was launched on 28/06/2017.

Fund Currency The base currency of the Fund is GBP.

Switching You may switch your shares in the Fund to other shares of the Fund in which you are eligible to invest. Further information is available from the Administrator.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 August 2021 and 28 October 2022.

Moderate: this type of scenario occurred for an investment between 29 March 2016 and 29 March 2019.

Favourable: this type of scenario occurred for an investment between 31 March 2014 and 31 March 2017.

Recommended holding period		3 years

What happens if the Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 GBP is invested.

Example Investment 10,000 GBP	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	675 GBP	1,259 GBP
Annual cost impact*	6.8%	3.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.5% before costs and 4.8% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	5.00% of the amount you pay in when entering this investment. This is the maximum cost and may include anti-dilution levy.	500 GBP
Exit costs	0.00% , we do not charge an exit fee for this product, but the person selling you the product may do so. In the case of an Anti-Dilution Levy applied to redemptions, such levy shall not exceed 3% of the redemption monies.	0 GBP
Ongoing costs taken each year		Annual cost impact if you exit after 1 year
Management fees and other administrative or operating costs	1.39% of the value of your investment per year. This is an estimate based on actual costs over the last year.	139 GBP
Transaction costs	0.36% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	36 GBP
Incidental costs taken under specific conditions		Annual cost impact if you exit after 1 year
Performance fees	There is no performance fee for this product.	0 GBP

How long should I hold it and can I take money out early?
